

ASSOCIATE OF SCIENCE IN HEALTHCARE ADMINISTRATION

Earn the credentials you need to help advance your health care career

About the Associate of Science in Healthcare Administration program

The Associate of Science in Healthcare Administration degree program is designed to meet the needs of individuals who desire to work in the allied health industry and prepares graduates for employment in a health care administration setting.

This A.S. degree program also provides general education courses which will afford you the opportunity to accept positions and/or promotions at a higher level of employment.

What will I do as a graduate of this program?

As a graduate of this program you'll have the knowledge and skills you need to become a productive team member interacting with and/or managing other employees in a health care office setting working with patients and/or patient health care information.

What careers are available after I graduate?

As a graduate of this program, you will have the skills and credentials needed to work in a wide range of facilities, including health care institutions, hospitals, clinics, medical offices, insurance companies, public agencies or health maintenance organizations.
