

# SURGICAL TECHNOLOGIST

## *Associate of Occupational Science Degree Program*

### What will I do as a Surgical Technologist?

Surgical Technologists (also known as surgical techs, operating room technicians, and OR techs) assist in surgical operations, preparing operating rooms and helping surgeons, nurses, and doctors before and during surgical procedures.

They are a vital member of the operating room team, passing instruments to surgeons during surgeries, maintaining sterile fields, keeping instrument tables organized and managing operating room supplies to ensure that procedures flow smoothly and successful.

### What careers are available after I graduate?

Graduates of this program earn their Associate of Occupational Science (AOS) degree and are qualified to work in hospitals, delivery rooms, ambulatory/out-patient surgery centers and medical clinics providing surgical services.
